Colville, WA 99114-0072

Dear Mr. Shamion,

One year ago Clean The Uniform Company – St. Louis opened the doors on its brand new medical facility. One of the many equipment additions was the Triple Connie Turbo II. I wanted to write you to let you know how pleased we have been with the unit. Not desiring to detract from any of the services or quality of equipment that was received from all of the vendors included in the start up of Clean's first ground up medical facility, the Connie has been fantastic. What had been more than a fulltime job on a single buck tensioner was reduce to less than two hours per day. In addition the Connie was the only machine that after start up did not require any additional service. In short the Connie and start up services provided more than met my expectations.

I look forward to more opportunities using Colmac equipment in the future,

Sincerely,

A handwritten signature in black ink, appearing to read "Greg L. Huene".
