

# AccuCounter<sup>®</sup> Light Frames

Automated soil counting for all types of soiled items including shop towels, uniforms, medical and restaurant linens.

## System Features:

- Items can be collected directly into a sling cart or onto a conveyor belt
- Light frames may be configured with one or multiple frames per workstation
- Multiple languages available. Touch screen convenience.
- Resettable, on-screen sling counter
- Solid-state, fan-less PC and LCD industrial touch screen monitor
- Counts are recorded at the Host computer and can be exported to any route accounting system
- Tracking reports by Customer, Ticket, Item or Operator

## Bulk Light Frame Option

- Ideal for counting many of a few different type of items
- One or more items can be assigned to different frames
- Operator is alerted when sling is full and needs to be changed
- Alerts when sling assignments change based on customer account
- Designed for bulk accounts such as Hotel/Motel, Healthcare and Industrial
- Multiple frames assigned to one touch-screen control station

Individual Station Light Frame

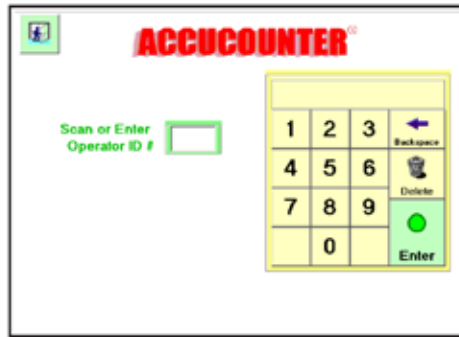

Bulk System - items are counted and collected directly into slings

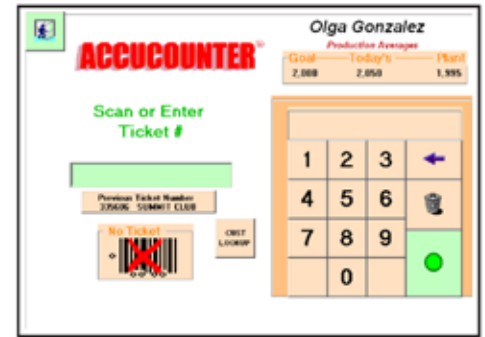

Light Frame w/ accumulator bin option

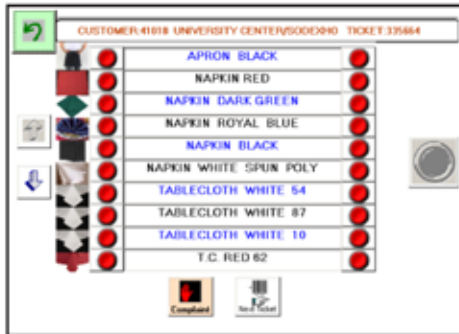

Multiple languages to select from using the convenient touch screen.

An operator ID is entered for tracking productivity and control.

A ticket or invoice number is scanned with the bar code reader or entered manually to access a customer's account.

An item to be counted is selected from the list of items on the soil ticket.

The count screen displays current piece count and allows for adjustments and tracking abused items.

The maintenance screen displays real-time status of sensors and tests bar code reader integrity.

Features	Benefits
Interfaces with route accounting software and invoicing modules.	Keeps dirty soil tickets out of your office and eliminates unnecessary data input labor.
Utilizes touch screens.	Increases accuracy and operator productivity.
