

...Start with accuracy, finish with quality

AccuCounter® Soil Counting

Sorts, manages inventory, interfaces seamlessly with route accounting software and monitors operator performance. Provides the credible data necessary to account for losses and abuse of linens and garments.

System Features:

- Save 40 to 60 percent in labor over manual counting
- Variable-On-Demand vacuum saves energy and maintenance costs
- Convenient touch screen operation
- Modular, self contained 24 volt control panel
- Built-in bar code scanner (optional RFID reader available)
- Windows® based software
- Custom-built ergonomic work table to fit your specifications
- Industrial grade LCD touch screen monitor and solid state, fan-less PC
- Stainless steel accumulator bin with automatic sliding door
- Quick disconnect stainless steel transport tubes
- Item photos, multiple languages and complaint selections
- Accurately counts a wide variety of various sized items
- Full installation and on site start-up training
- Backed by the best service in the industry

AccuCounter® Soil Sorting Table

- Large stainless steel, ergonomic table puts the operator near the sort tubes and the items to be counted minimizing movement, reducing fatigue and increasing production.

AccuCounter Integrated System

Options:

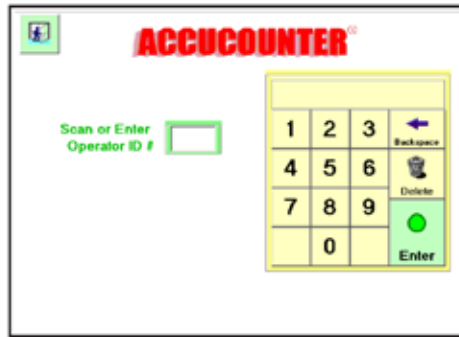

- Third sort tube
- RFID chip scanner
- Extended service and support warranty
- Buffer bins

Companion Product

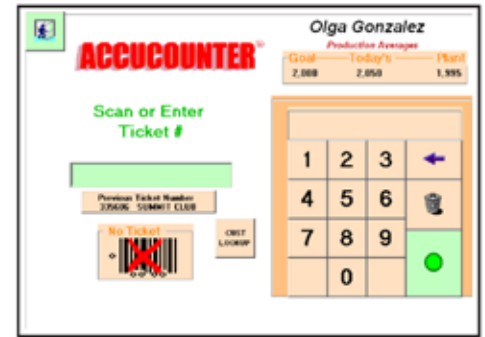

- AccuSort - a classifier for counting and loading directly into the sling(s)

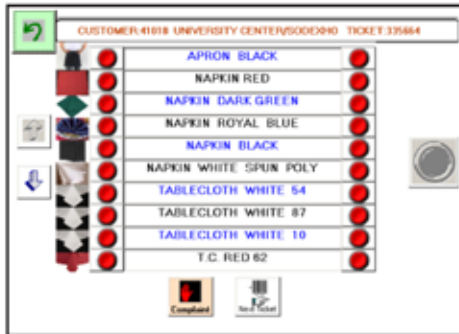

Multiple languages to select from using the convenient touch screen.

An operator ID is entered for tracking productivity and control.

A ticket or invoice number is scanned with the bar code reader or entered manually to access a customer's account.

An item to be counted is selected from the list of items on the soil ticket.

The count screen displays current piece count and allows for adjustments and tracking abused items.

The maintenance screen displays real-time status of sensors and tests bar code reader integrity.

<i>Features</i>	<i>Benefits</i>
40 to 60 percent savings in labor over manual counting	Quick payback on investment
Interfaces with route accounting software and invoicing modules	Keeps dirty soil tickets out of your office and eliminates unnecessary data input labor
Adjustable, ergonomic table design	Minimizes operator movement by placing the operator close to the items and the tubes. Large LCD touch-screen display
Microsoft® Windows based software	Universal appeal and understanding of its operation. Allows for remote troubleshooting and monitoring. Onboard self diagnostics keeps the system up and running. Provides credible data for accountability
Independent computer	If host computer fails, then the data is retained and counting continues
Thumbnail photos of items and multiple language selections	Aids learning, eases operation and increases productivity
Stainless steel table and bins	Sanitary, easy to clean. Provides years of maintenance-free service
Time delay for various size pieces	Ensures accurate counting of large, medium and small sized items
Variable on demand vacuum	Reduces energy costs, component wear and maintenance
Continual on-board status displays	Informs operator that sensors and controls are operating properly
Tracks operator productivity by piece or points and records reason for logging off the system	Production management tools to track high or low producing employees
