

# BuckUp Legger

## PANT / UTILITY / HOTHEAD PRESS

An innovative pressing mechanism insures consistent full coverage press every time. Steam emitting legger style pressing chest with vacuum compatible lower buck design allows you to operate with or without vacuum.

- Air-bag actuator raises the buck up, vertically distributing even pressure against the upper press plate. A unique application of this proven technology.
- Designed for a high quality finish, with ease of operation, operator safety, and reliability as top priorities
- Gives a quality press with crisp creases, even as the press padding wears
- Adjustable work height
- Standard two-year warranty
- Backed by the best service department in the industry

Features	Benefits
BuckUp pressing	Prevents garment rollover ensuring consistent, even pressure.
Air-bag actuator	Reduces wearable parts and uneven pressure
Vacuum equipped	Steam penetrates the fabric improving press
PLC Controlled	Control system incorporates safety features and high reliability
Adjustable working height	Optimum ergonomic fit
Steam activates after press plate reaches position	Live steam cannot engage unless press plate is in safe position
Top mounted machine controls	Easy access to all controls
Variable cycle time	Configure process for particular fabric types
Aramid-fiber top press plate cover	Protects against burn injuries
E-stop equipped	Bottom buck immediately drops 3 inches
