

Tunnel Finishing

CFS Series Narrow Body

Narrow-body tunnel finisher for damp or dry garments

- Shoulder-to-shoulder orientation for optimum finish
- High quality garment finish eliminates the need for most pressing
- Automatic loading and unloading of garments
- Available exhaust system reduces work space heat
- Improves productivity and operator ergonomic conditions

Now Available in a BOILERLESS model

CFS Series Wide Body

Wide-body tunnel finisher for damp garments

- Efficient front-to-back garment flow
- 360° steam jets for maximum fabric relaxation and wrinkle removal
- Digital conveyor speed, garment counter and thermostatic control
- Adjustability provides optimum operation efficiency
- Uses minimum floor space and improves energy efficiency

Now Available in a BOILERLESS model

CFS Modular Wide Body

High-volume, wide-body tunnel finisher for damp garments

- Modular design for custom solutions
- Higher productivity and increased energy savings
- Insulated, stainless steel walls & ceiling
- "Walk-through" steam section with infinite adjustment
- Fully enclosed "state-of-the-art" gas train
- Stainless steel entrance enclosure standard
- Each module independently controlled

CTU Series

Wide-body, U-turn tunnel finisher for damp garments

- User-friendly touch screen control
- The most advanced blower system in 'U' tunnel design
- Unique air distribution system for maximum fabric relaxation and wrinkle removal
- Efficient front-to-back garment flow

Garment Presses

Triple Connie Turbo II

High Production, triple buck long-garment press

- Automated pressing of lab coats, chef coats, smocks, and other long garments
- Presses shirts with the same excellent finished quality

3-CPU

Automated, high production shirt press

- Uniform rental industry, formal wear and executive wear
- Vacuum hold down for no-mark finish

Pant-A-Matic 1400

Full leg crease and steam air finish in one easy step

- Waist adjustment from 26" to 60"
- Automatic inseam adjustment to 38"
- One operator with two machines can press up to 150 pants per hour
- Textured and pressing surface results in "no shine" finish
- Quiet operation and ergonomic features enhance operator workspace

Topper

Finisher for tops of pants, slacks, skirts and more

- Automatic waist expander adjusts from 26" to 54"
- Ergonomic design reduces worker fatigue
- Faster cycle times for improved productivity
- Fewer parts and easy serviceability

Sleever

Sleeve press

- Laser guided sleeve-height alignment for more consistent quality pressing and improved productivity.

Utility Press

Pant / utility / hothead press

- Buck moves up preventing garment rollover
- Airbag actuator ensures even pressure
- Adjustable work heights
- Fewer parts and easy serviceability
- Optional vacuum improves finish

Collar 'N Cuff

Collar and cuff press

- Quality pressed finish to the collar and cuffs

Soil Room Systems

AccuCounter Light Frame

Non-vacuum systems ranging from single to multi-framed bulk systems. Perfect for counting healthcare, industrial, or hospitality items.

AccuSort

Soil classifying system

- Deliver directly to dedicated bins
- Reduces belt congestion and labor costs
- Improves wash load accuracy
- Helps maintain a clean work environment
- Compatible with automated rail systems
- AccuCounter Software

AccuCounter

Soiled Linen Counting System

- Sorts, manages and tracks inventory
- Route accounting software interface
- Monitors operator performance
- Easy-to-use touch screen
- Multiple language display
- Piece counting up to 2,000 per operator hour

Hanging Systems

CHS-2

Automated hanging system

- Small footprint to save production space
- Loads more than 400 hangers per hour
- Saves 40% in labor costs over manual loading
- Special hanger separator guarantees single hanger delivery

Hanger Stand

Ergonomic assisted garment hanging

- Quickly switches between pants and shirts
- Large storage area for hangers

Smart-Veyor

Vertical-pendant style conveyor

- Turns itself off and alerts operator of conveyor problems
- Flashing alert light warns operator of conveyor problems
- Easy-to-read digital rate indicator displays pendants per hour

AutoMac

Automatic hanger loader for pendant conveyors

- Improves overall productivity and efficiency
- Automatically adjusts to speed changes on conveyor system
- Available in a variety of lengths to accommodate loading stations

AccuStat

Operator counting system

- Indicates the tempo of production and tracks operator production

Infiniti Conveyor

"No-drop" design prevents dropped garments

- Eliminates hanger swing
- Accepts virtually all types of hangers
- Provides straight-on and straight-off loading and unloading

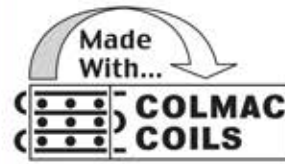

Why Buy Colmac?

Product Offerings:

- Full line of products for finishing department
- Industrial equipment applications
- Expandable straight through and U tunnel design
- Tunnel capacities range from 50-4500 garments/hr
- Boilerless tunnel finishers
- World's only long garment triple buck press
- Complete line of pressing equipment
- Soil sorting, counting and transport systems

Service:

- 24/7 free phone in tech support
- Experienced staff of service technicians
- 20+ years average experience
- Large inventory of spare parts in stock
- Overnight shipping until 5:00pm EST for early AM next day delivery
- Two year manufacturer's warranty

Since 1971, Colmac has manufactured heat exchange coils for its own equipment and for after-sale replacements and OEM's.

This capability ensures the high quality of Colmac's equipment, it guarantees quick availability for replacement parts and it makes new product innovation possible. Look for the "Made with Colmac Coils" symbol. It's your guarantee that Colmac excellence is built right in.

Engineering Services

Engineering Services

Colmac offers custom engineered solutions to meet your specific needs. Let us design and build a product to meet your finishing department, soil room or special needs:

- Sheet Metal Fabrication
- Machine Shop
- UL508 Electronics Shop
- R & D Test Lab
- Plating Plant
- Industrial Sewing Room
- Custom Paint Booth
- Wood & Crating Shop

About Us

Providing worldwide solutions to over 50 countries and growing.

Colmac was established in 1959 by Jerry McMillan, a laundry owner in the small town of Colville, located in the northeast corner of Washington State. Jerry's first product was a coverall finisher, the Coverall-Matic, and his innovations continued until his untimely death in 1974. Roger, Jerry's son, led Colmac to perfected finishing of 65/35 blends. At the start of the new millennium, Roger's son, Scott started the next generation of innovation. Like his father and grandfather, Scott stresses quality and service.

We manufacture durable, reliable and serviceable equipment which has proven over the years to be the best value per dollar in the markets we serve.
