

# *ColMission Services*

## **Why should you order the Colmission start-up and training service?**

**C**olMission is an option that brings a Colmac-certified technician on site to commission new Colmac equipment and to teach operations and maintenance. The plant is responsible for equipment installation and delivering utilities to equipment. The customer provides ready-to-process items in sufficient quantities for thorough validation of machine performance. Pricing includes lodging, meals, and car rental for technician.

**The technician will instruct your supervisors and operators the proper way to load garments for quality and productivity. They will offer tips and methods that could save time and money!**

It does not include airfare, which is invoiced separately based on actual airfare charges.

Colmac technicians are highly trained and experienced personnel. They have years of experience in dealing with installation, start-up, training, trouble-shooting and maintaining Colmac products. They are experienced teachers that can train your personnel on the best operation and maintenance procedures for your new machine and, if time allows, help to tune-up any older Colmac products you may have in your plant. All of our technicians work on the final assembly test line here at the factory, quality testing and tuning each Colmac product before it is shipped. They know your Colmac equipment inside and out.

All of our technicians have an intimate knowledge of Colmac equipment with over 77 years of combined experience. If you have a Colmac technician help start up your new Colmac machine, you are getting an expert.

*...Start with accuracy, finish with quality*
